

CMS

Joomla

Joomla! (произносится джумла) — система управления содержимым (CMS), написанная на языках PHP и JavaScript, использующая в качестве хранилища базы данных СУБД MySQL или другие стандартные промышленные реляционные СУБД. Является свободным программным обеспечением, распространяемым под лицензией GNU GPL.

The screenshot shows the 'Configuration and modules' page of a Drupal 7 site. At the top, a red banner displays the message: 'One or more problems were detected with your Drupal installation. Check the status report for more information.' Below this, the page is divided into several sections:

- REGIONAL AND LANGUAGE**
 - Regional settings: Settings for the site's default time zone and country.
 - Date and time: Configure display formats for date and time.
 - Languages: Configure languages for content and the user interface.
 - Translate interface: Translate the built in interface and optionally other text.
- SEARCH AND METADATA**
 - Clean URLs: Enable or disable clean URLs for your site.
 - Search settings: Configure relevance settings for search and other indexing options.
 - URL aliases
- SYSTEM**
 - Site information: Change basic site name, e-mail address, slogan, default front page, number of posts per page, error pages and cron.
 - Actions: Manage the actions defined for your site.
 - Shortcuts: List the available shortcut sets and switch between them.
 - Statistics: Control details about what and how your site logs access statistics.
- PEOPLE AND PERMISSIONS**
 - Account settings: Configure default behavior of users, including registration requirements, e-mails, and user pictures.
 - Roles: List, edit, or add user roles.

DokuWiki

DokuWiki (Докувики) — вики-движок, который может быть использован для создания документации. Автор проекта — Andreas Gohr (Andreas Gohr). В отличие от многих других движков, DokuWiki использует для хранения страниц текстовые файлы, таким образом единственным требованием является поддержка хостингом PHP (последний релиз требует PHP 7.4 или новее). Код движка распространяется на условиях GNU General Public License версии 2.
